★ INTERNATIONAL ASSOCIATION OF
PROJECT MANAGERS

CERT. JUNIOR PM

Entry-level Certification

The IAPM International Association of Project Managers offers the traditional project management certifications, Certified Project Manager and Certified Senior Project Manager, for people with at least five years of project experience, as well as entry-level Certified Junior Project Manager (IAPM) certification. A survey conducted in 2013 by the German Digital Economy Association (BVDW) about students' expectations of their future careers revealed that the majority of students want careers in 'marketing and sales' (56.4%), 'project management' (53.1%) or 'PR and communications' (40.5%).

These survey results clearly illustrate the relevance of project management certifications that are feasible and affordable for students, career starters or career changers. Certified Junior Project Manager (IAPM) strikes the right chord with many people who are keen to take their first steps in project management. That's why one potential target group for this certificate are students who have covered the topic of project management in their degree courses or are interested in the subject and believe it to be important for their career development.

It could be described as the 'little brother' of the Certified Project Manager certification. It is inexpensive (costing just a fraction of the fees for other IAPM certifications), and it certifies basic knowledge, but not project experience. The IAPM wants to actively promote project management as a key qualification as early as possible, so this certification is designed to attract a younger audience and encourage them to take an interest in project management very early on in their careers.

Acquiring project management knowledge as early as possible isn't just an advantage for people who are planning a career in project management. Aspects of project management such as advance planning, soft skills such as respectful and motivating interaction with other members of the team or the knowledge of how to approach both small and large-scale projects are also advantages to people in careers outside project management. So Certified Junior Project Manager (IAPM) certification encourages people to get involved in this key subject and today's junior project managers could go on to be tomorrow's senior project managers.

One in five project managers works at a company where project management certification is mandatory for employees. (Source: IAPM, certificate holder survey 2015)

You can freshen up and broaden your knowledge with the help of the PM Guide 2.0 (which can be viewed free of charge at www.iapm.net), because it forms the basis for the IAPM online certification examination.

It provides detailed explanations of the hard and soft factors of project management as a compact, logically structured and easy-to-understand certification baseline.

All the information about this certification can be found at www.iapm.net

1

Competitive Advantages & Career Launching Pad

- ✓ Proven project management competence
- ✓ Competitive advantages for organisations and individuals
- ✓ Standardisation of terms and methods with the PM Guide 2.0
- ✓ External, objective verification of knowledge and experience

2

Online Examinations

- ✓ No travel expenses
- ✓ No pressure of time to prepare
- ✓ Exams can be taken on any PC

3

No Re-Certification necessary

- ✓ No certificate expiry date
- ✓ No new costs

4

Fair Prices

- ✓ The fees depend on the GDP of the country in which the certificate candidate has citizenship.

5

Anonymous Certification

- ✓ No subjective assessments
- ✓ No "fail quota"
- ✓ No discrimination

IAPM

INTERNATIONAL ASSOCIATION OF PROJECT MANAGERS

Since 1997 the IAPM has been committed to promoting project management competence, ensuring uniform standards and certifying project management knowledge and experience.

The IAPM is an independent certification body which examines the knowledge and competence of the certification candidates with a comprehensive, fair and neutral online examination system. The certification system is therefore tailored to the challenging world of project management in the 21st century.

The PM Guide 2.0 is the basis for the traditional IAPM project management certifications and it contains all the knowledge modules that the project manager has to be competent in to gain an internationally valid certificate as Certified Junior Project Manager from the IAPM International Association of Project Managers.

The PM Guide 2.0 can be viewed free of charge at the IAPM website (www.iapm.net). Anyone can access it, whether they wish to obtain certification or not.

Comprehensive information about online certification and registration and prices can be found at www.iapm.net
